

# Atrial fibrillation ablation: pitfalls and potential solutions

Citation for published version (APA):

Kumar, N. (2015). *Atrial fibrillation ablation: pitfalls and potential solutions*. [Doctoral Thesis, Maastricht University]. Maastricht University. <https://doi.org/10.26481/dis.20151105nk>

## Document status and date:

Published: 01/01/2015

## DOI:

[10.26481/dis.20151105nk](https://doi.org/10.26481/dis.20151105nk)

## Document Version:

Publisher's PDF, also known as Version of record

## Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

providing details and we will investigate your claim.

- Use of Adenosine for atrial fibrillation (AF) ablation is an excellent ADVICE!
- Epicardial radiofrequency and endocardial cryoballoon ablation for AF can be synergistic and safely used together for a single patient.
- Second generation single shot ablation devices (cryo and laser) yield similar AF success rate.
- More is not better for AF ablation using radiofrequency (contact force) and cryo (temperature).
- The force of contact (of ablation catheter) determines your success- in the war against arrhythmia.
- Transformation of electrophysiology to electrophysionics is inevitable.
- "My message, especially to young people is to have courage to think differently, courage to invent, to travel the unexplored path, courage to discover the impossible and to conquer the problems and succeed. These are great qualities that they must work towards." Dr. A P J Abdul kalam- a scientist who later also became India's president
- "There is a lesson in both victory and defeat. If we don't learn from victory it leads to defeat, if we don't learn from defeat that leads to destruction. We have to think beyond victory or defeat." Narendra Modi- India's prime minister
- De gestadige drup holt de steen.
- "This is not the end, this is not even the beginning of the end, this is just perhaps the end of the beginning." Winston S. Churchill
